

TPI TURKEY INTEGRATED MANAGEMENT SYSTEM POLICY

As TPI Turkey, as an establishment adopted growth of clean energy as its form of life by generating competitive and innovative composite solutions, in line with our Integrated Management System that covers TPI Turkey Factories' "Wind Blade Production, Warrantee and Maintenance Services" which are formed in line with our missions, principles and values;

Our commitments;

Protecting living being, natural resources and preventing environmental pollution,
To increase awareness of social responsibility,
To form platforms for participation and consultation of our employees for sustainable improvement and development of our activities and encourage our employees,
Efficient use of the materials and energy we use while providing our products and services;
To contribute to the communities in which we operate;
Developing energy resources, products and services for these purposes;
Leading in introducing best practices in our business lines;
To create a culture where our leaders will be accounted for, all of our employees will be involved and share these commitments; and
To produce wind turbine blades with Safe, Quality, Timely and Optimum cost, for our customers,

In this way, we aim to achieve such a Quality and EHS performance that we can be proud of, to win the trust of our customers, our stakeholders and the society, and to contribute to sustainable improvement. In accordance with this purpose;

Our Policy;

Design a systematic approach to Quality and EHS Management for compliance with laws, national and international relevant standards and continuous performance development;
Identify, evaluate and monitor risk factors and opportunities and take actions whenever needed;
We will set targets for development, measure, evaluate and report performance;
We will ask the service providers to manage Quality and EHS in accordance with this policy;
We will establish close relationships with those affected from our operations;
We will make Quality and EHS performance of our employees' part of their evaluation and recognition process.
